VICK'S VAPORUB

offers a new way to treat croup and cold troubles

THE OLD WAY

Treatment by internal dosing, which does not reach direct to the affected parts and which frequently does derange the digestion.

DIRECTIONS FOR THE USE OF VICKS

Vapors Important - For diseases of the respiratory organs, such as colds, a large part of the value of Vicks lies in its vaporizing qualities. Therefore, whenever Vicks is applied over the throat and chest, care should be taken to leave the clothing loose around the neck and the bed clothes arranged in the form of a funnel, so that the vapors arising may be freely inhaled.

Hot Wet Cloths -- In cases of very severe colds, sore throat, coughs, incipient pneumonia, etc., hot, wet towels should be applied over the throat and chest to open the porce of the skin before applying Vicks.

Fresh Air-Plenty of fresh air in the bed room is the best way to prevent colds and lung troubles. Fresh air does not cause colds; it strengthens the lungs, enabling the system to throw off colds.

Asthma - Vicks is not a "cure" for asthma-so far as we know, there is no does give relief. Rub it well over the spinal column, from the neck to the hips to relieve the nervous tension. Then apply freely over throat and chest at bed time and cover with hot flannels Renew frequently and always have the covers loose, so that the vapors may be freely inhaled. Also melt Vicks in a spoon and inhale the vapors and apply a little up the nostrils.

Bronchitis, Sore Throat, Colds in the Chest-If a severe case, first apply hot, wet towels over the throat and chest. Then rub Vicks in well until the skin is red, spread on thickly and cover with two thicknesses of hot, ilan-

Catarrh, Colds in the Head-Melt a attle Vicks in a spoon and inhale the vapors. Also apply well up the nostrils There are so many varieties of catarrh that a competent physician should al-ways be consulted. For many forms, however, Vicks is excellent. Dissolve a half teaspoonful of salt in a pint of warm water and snuff up the nostrils night and morning. Then insert Vicks freely up the nostrils as far as posaible, snuffing well back into the sir

Children's Colds - Vicks is particularly valuable in treating children's colds, since it is an external treatment, and therefore, does not disturb the delicate digestions of children. The best plan is to keep Vicks constantly on hand and apply freely and often at the first sign of "sniffles."

Growing children require plenty of fresh air and exercise and should be

OLDS are simply inflammation or congestion of the mucous membrane or lining of the respiratory organs-air passages and lungs. They should be treated just as surface inflammations, such as Burns or Bruises are treated - that is, the medication should be applied directly to the inflamed parts. Internal medication going to the stomach does not reach directly the affected parts. But medication cannot be applied directly to the air passages and lungs except in the form of vapors that can be inhaled; and, until the discovery of Vick's VapoRub, there was no efficient, economical method of supplying these vapors.

THE NEW WAY

Treatment by Vick's VapoRub, which is applied externally—relieving by inhalation as a vapor and by absorption and stimulation through the skin.

> kept in the open as much as possible, even in the winter.

Coughs-Apply Vicks as directed for Colds in the Chest and Head, and if the cough is very annoying, swallow very few hours, a small piece the size

Croup Spasmodic—Rub Vicks freely over chest and throat until the dif-ficult breathing is relieved. One application is usually enough. To prevent croup during the night, give a good application over the throat and chest at bed time and cover with hot, flannel

Influenza-In spite of the epidemic last winter, very little is known of this disease—even the germ causing it is not yet definitely located and no specific for influenza so far as known has been discovered. In all cases a physician should be called promptly.

Vicks is to be used as an external application in connection with the physician's treatment. Apply as directed

To Avoid Influenza - Influenza is a spit-borne disease, and when inhaled the germs attack the mucous membrane, or lining of the air passages. Even this is not absolutely certain, but it is agreed by most authorities that keeping the system in good condition and the air passages stimulated and free from colds is the best way to avoid the disease.

Melting a little Vicks in a spoon night and morning and inhaling the vapors, and applying well up the nostrils several times a day, particularly when in

crowds, is recommended. Pneumonia-(1) Send for your physician at the first sign of pneumonia.

(2) Immediately begin the use of Vicks as an external application. For pneumonia, Vicks is applied somewhat as directed for Deep Chest Colds—for full directions see the Directions Folder. Tonsilitis-Apply as directed for Sore

Whooping Cough — This is a self-limited disease, running a course which varies from a few weeks to several months. There is no known specific-Vicks is of value in easing the cough paroxysms, and thus lessening their weakening effect on the system. Rub Vicks well over the spinal column, from the neck to the hips, to relieve the nervous tension. Then apply over throat and chest, covering with hot flannels.

Vicks is Not Meant to Replace the Physician-At the first symptoms of a serious illness, such as preumonia, a physician should always be called. Many other troubles, such as chronic catarrh or continued headache, call for the diagnosis of a good doctor.

Vicks Acts Both Externally and Internally

TICK'S VAPORUB is the discovery of a North Carolina druggist, L. Richardson, who found a way to combine the standard, time-tested remedies-Menthol, Camphor, Turpentine, Eucalyptus, Thyme, Juniper, etc. - in salve form, so that when Vicks is applied to the body, these ingredients are vaporized by the body heat.

INTERNALLY, these vapors, inhaled with each breath all night long, carry the medication direct to the air passages and lungs

EXTERNALLY, Vicks is absorbed through and stimulates the skin, attracting the blood to the affected parts and aiding the vapors inhaled to relieve the inflammation or congestion.

How the Use of Vicks Has Grown

Starting with the customers of Mr. Richardson's retail drug store, the use of Vicks has increased county by county, state by state, until now more than 17 million jars are used annually - practically one jar for every family in the United States—and this in spite of the fact that Vicks is still a new treatment to many people in the North and West. Once used, Vicks is a friend for lifeit is so easily applied—so quick in its results.
